

MISS CLAIRE MELLON & ASSOCIATES

Obstetrics fees

Early Pregnancy £400

An early pregnancy assessment is recommended between 6-7 weeks. The initial consultation and pregnancy scan will be carried out by one of our Associates and costs £400. They will perform a scan, provide information and answer any questions relating to your pregnancy and refer you on for prenatal testing. If you would like to deliver with Miss Mellon please kindly contact office.

The obstetrics package £11,000

Miss Mellon offers an obstetrics package – an all-inclusive fee of £11,000 for antenatal care from 16 weeks of gestation, delivery and post-natal care. The package is to be paid in two instalments: the initial 50% is due at 20 weeks and the remaining balance at 34 weeks. If you are covered by insurance, we can provide a breakdown of fees as required.

The same fee is charged whether the pregnancy is straightforward or complicated, and whether the birth is via natural vaginal delivery or via caesarean section.

Please note that fees for hospital services, specialist scans, pathology tests, anaesthetists and paediatricians are charged separately by the relevant service.

The caesarean section package £7,500, plus £450 per appointment

If you require a caesarean section but have opted to do most of your care elsewhere, the cost is £7,500 for the delivery plus £450 per consultation. Your obstetrician would wish to see you for two consultations prior to delivery and a postnatal review 6 weeks following. Payment is required at 34 weeks of gestation.

Please note that fees for hospital services, pathology tests and paediatricians are charged separately, as is the anaesthetist at £1,200.
