

MISS CLAIRE MELLON & ASSOCIATES

## Obstetrics fees

### The obstetrics package is £12,000

Miss Mellon offers an obstetrics package – an all-inclusive fee of £12,000 for antenatal care from 16 weeks of gestation, delivery and post-natal care. The package is to be paid in two instalments: the initial 50% is due at 20 weeks and the remaining balance at 34 weeks. If you are covered by insurance, we can provide a breakdown of fees as required.

An early pregnancy assessment is recommended between 6-7 weeks. This will be carried out by one of the associates and will incur an additional charge of £450.

The same fee is charged whether the pregnancy is straightforward or complicated, and whether the birth is via natural vaginal delivery or via caesarean section.

Please note that fees for hospital services, specialist scans, pathology tests, anaesthetists and paediatricians are charged separately by the relevant service.

### The delivery only package is £8,000, plus a minimum of 2 appointments at £500 each

If you require management of delivery only and opt to receive your care on the NHS or elsewhere the cost will be £8,000 for the delivery plus £500 per consultation. Your obstetrician would require to see you for a minimum of two consultations prior to delivery and a postnatal review 6 weeks following. Payment is required at 34 weeks of gestation.

Please note that fees for hospital services, pathology tests and paediatricians are charged separately, as is the anaesthetist at £1200.
